ELLIOT KEEN

System Administrator

Profile

I am a former Full-Stack Web Developer at IBM with a passion for cybersecurity seeking employment in system administration in Austin, Texas. I hold a Bachelor of Science (Honours) in Software Engineering from Manchester Metropolitan University. I consider myself a "geek", but I am of the breed that has excellent communication skills and thrives in team settings. I will be sitting for the Certified Ethical Hacker (CEH) certification exam in February of 2020.

I have the right to live and work in the United States.

Employment History

Full-Stack Web Developer @ IBM UK

November 2018 - November 2019 // London, UK

- Worked on an **Agile** development team for the **My Sales Activity** (MySA) web application, an incentive manager to over **13,000 users** globally.
- Migrated a legacy **AngularJS** web application to **ReactJS,** which involved coordinating with the MySA design team to incorporate behavioral-science-based design decisions into the application.
- Pursued interest in cybersecurity whilst working as a full-time developer, completing two certification programs (listed under "Achievements").

Junior Web Developer @ Roco Clothing Limited

August 2017 - June 2018 // Manchester, UK

- **System admin** for Windows Server (2012 & 2016), LastPass Teams, Slack, Trello, BitDefender, and Magneto website.
- Acted as a **B2B integrations** liaison on behalf of the company to secure competitive rates and contracts with companies such as Payoneer and DHL.
- Transitioned to **GDPR-compliancy**, including implementing business-wide custom security policies.
- Built an internal **Laravel** (PHP) web application in order add functionality to the current Order Management System utilizing the **Linnworks API** with the goal of easing communication between Customer Service and Warehouse.

eCommerce Engineer @ Roco Clothing Limited

August 2016 - August 2017 // Manchester, UK

- Ongoing front-end and back-end development of the core **Magento**.
- Created the company "Help" section using **JavaScript** with the incorporation of tabs and collapsible elements.
- Redesigned all automated transactional emails sent by **Magneto** and **Linnworks**.
- Set up and monitored company-wide **RAID backup solution** utilizing a **Synology NAS** drive. Maintained various Windows PCs and MacOS computers on a **Windows Server** network.

Volunteer Experience

Caregiver @ Community Service Volunteers (now "Volunteering Matters")

September 2012 - August 2013 // Scotland, UK

Voluntary full-time live-in caregiver for severely disabled young man.
